EXPERIENCE

London Automation 2024 – Present

Security Manager

- Develops, maintains, and recommends security-related policies, ensuring compliance with industry standards and best practices.
- Establishes security standards, processes, and controls to implement approved security policies.
- Monitors compliance with information security policies and mitigates risks accordingly.
- Conducts information security risk assessments and develops risk mitigation strategies.
- Advises executive leadership on security threats, emerging technologies, and regulatory compliance.
- Collaborates with cross-functional teams to integrate security considerations into the software development lifecycle.
- Evaluates, recommends, and implements security solutions to enhance security posture across networks, databases, servers, and access management systems.

Top Level Martial Arts 2018 – Present

Instructor

- Led structured training sessions, breaking down complex techniques into digestible steps, enhancing students' problem-solving skills and adaptability.
- Created personalized development plans, assessing strengths and weaknesses to optimize individual growth.
- Fostered a high-performance learning environment, maintaining discipline and motivation among students while managing diverse skill levels.
- Quickly adapted lesson plans in real-time to address challenges, injuries, or different learning styles, emphasizing flexibility, rapid problem-solving, and the ability to troubleshoot under pressure.

Technology Xperts 2021 – 2023

Network Administrator

- Monitored and managed firewalls and performed vulnerability scans to enhance client security.
- Initiated and managed phishing assessments to improve organizational resilience against threats.
- Developed and implemented network security protocols, conducting risk assessments, and staying updated on cybersecurity trends.
- Used Microsoft Sentinel to analyze security events and provide actionable intelligence.
- Conducted security awareness training, increasing the organization's overall security posture.

DRB Systems 2018 – 2020

Technical Support Representative III

- Supported escalations for complex technical issues, including hardware, software, and networking.
- Led projects for database management and multi-network systems integration.
- Coordinated with multiple teams to resolve high-priority technical challenges.

PROJECTS

Project: Implementing a [SOC and Honeynet in Azure](#)

Platforms and Technology Used: Azure Virtual Machines, Microsoft Sentinel (SIEM), Log Analytics

Project: Implementing a [Vulnerable AD Hacking Environment](#)

Platforms and Technology Used: VMWare, Windows Server 2019, Active Directory Domain Services

SKILLS AND TECHNOLOGIES

- **SOC Technologies:** Azure Virtual Machines, Microsoft Sentinel (SIEM), Log Analytics
- **Security Expertise:** Risk Assessment, Vulnerability Scanning, Phishing Assessments, Firewall Management
- **Programming and Automation:** Python, SQL, PowerShell (basic), Tableau
- **Networking and IT:** Windows and Active Directory, Office 365 Administration
- **Soft Skills:** Incident Communication, Cross-Functional Collaboration, Client Interaction

CERTIFICATIONS

- CompTIA A+
- CompTIA Security+
- CompTIA Network+
- CompTIA CySA+
- CompTIA PenTest+
- ITIL 4

EDUCATION

Bachelor of Science: Cyber Security and Information Assurance

Western Governors University, April 2024
